

SCHOOL ORAL HEALTH PROGRAM

Scenic Bluffs offers a School Oral Health Program to students at participating schools, at no cost to you. This program provides preventive dental care for students during the school day, in both the fall and spring.

What does this program provide?

- Preventive dental care, including dental sealants and fluoride varnish, from a licensed dental professional.
- Each child gets tooth brushing instructions, oral health education and a toothbrush to take home.
- Participating children will be sent home with a letter for parents describing the services provided and suggestions for further treatment, if needed.
- If additional treatment is needed, Scenic Bluffs can assist parents in getting their children a dentist appointment, if you would like.
- A follow-up visit. Scenic Bluffs will return to your school to ensure sealant placement was successful and if any additional teeth are ready to seal.

Sealant facts:

Sealants prevent 80% of cavities over 2 years in the back teeth, where 9 in 10 cavities occur.

X3

Children without sealants have almost 3 times as many cavities in the first molars as those with sealants.
